

Sub-slab Injector: TERMI-Tool

Airofog sub-slab injector TERMI-Tool is a professional injector delivering liquid termiticides accurately and efficiently through slab into soil, block, and concrete. It comes complete with a variety of tips for application to different structures and materials.

Features:

- Heavy-duty shut off valve
- Most effective and versatile with current termiticides
- Variable configurations for great flexibility
- Dual-coupling sizes for different external attachments
- Dual-length stainless steel pipe sets with foot ram assembly
- Built-in dripfree check valve for void tips

This professional injector can be fitted with optional in-line flow meter and digital display for easy monitoring of the injected liquid volume.

Multiple variety of stainless steel tips for wide range of application
