

Puff Duster

HANDY, COMPACT and EFFECTIVE !

The latest in professional dusting innovations using patented Airofog technology for application to control termites and vermin.

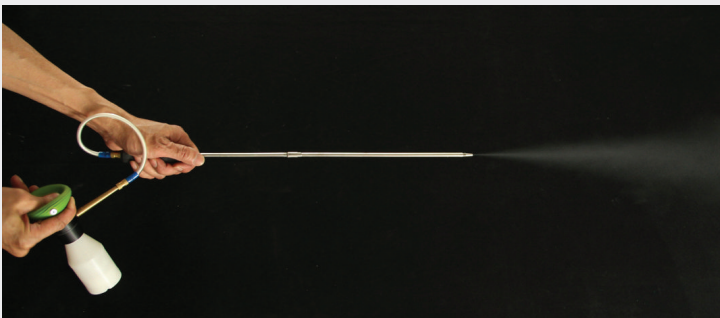

There are 3 configurations available
BASIC / STANDARD / PRO.

Transparent screw-on detachable vials help monitoring on the dust usage rate. 125ml vial allows for filling up to 90ml (3 oz) of dust and Ø32mm opening makes it easy for refilling.

The 50cm (20 inch) extension can treat hard-to-reach places.

Holster, with various compartments for tips and extensions, enhances professional image as a specialist.

Each squeeze produces a dosage of approximately 0.01-0.015g duster, which is measured with diatomite.

BASIC - for ready to use with 30ml vial of dust eg. Termidor Dust.

STANDARD - with 125ml vial and a carrying holster

PRO - reach further corner with 50cm (20 inch) tube extension
